## Quality Dental Instruments for the Veterinarian

Cislak manufactures quality dental instruments designed specifically for veterinarians. Our complete selection, ranging from prophylaxis to exodontia design, is engineered by skilled craftsmen with over 30 years experience in the dental industry. All Cislak instruments are hand crafted, with only the finest materials and state-of-the-art metal treatment, to assure you of unsurpassed performance, durability and value.

### Basic Prophylaxis Setup

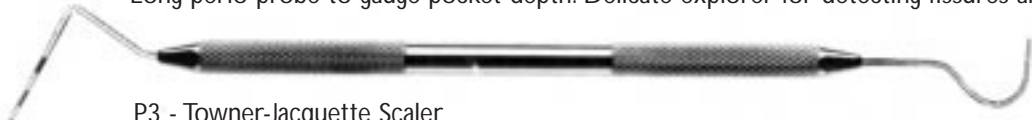

Complete set-up designed to handle routine diagnostic and prophylaxis procedures.

P1 - Mouth Mirror 4 (7/8" diameter)

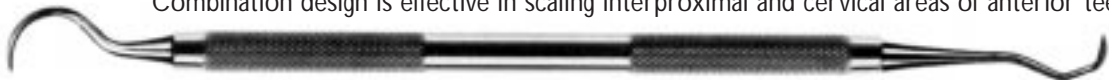

P2 - Probe/Explorer

Long perio probe to gauge pocket depth. Delicate explorer for detecting fissures and caries.

P3 - Towner-Jacquette Scaler

Combination design is effective in scaling interproximal and cervical areas of anterior teeth

P4 - Jacquette Scaler For interproximal application

P5 - McCall Scaler For posterior use

P10 - Columbia Curet Universal design for subgingival curettage

P11 - Offset Scaler - Super-thin blade, contra-angle shank.

Design is particularly effective in posterior interproximal areas.

P12 - Interproximal Scaler For posterior supragingival interproximal scaling

P14 - Jacquette-Sickle Scaler A more delicate design than our P3 Towner/Jacquette scaler

### Additional Items

P35 - Heavy Tartar Hoe

Also available a 10-pocket canvas rollup for instrument storage.  
Consists of 5 scaler size and 5 larger instrument pockets.

# Dental Instruments

## Periodontal Subgingival Scalers

Area-specific curets designed with rigid shanks for greater strength.

### POSTERIOR

P20 - Gracey

Designed for the lingual access on the mesiolingual and mesiobuccal surfaces of bicuspids and molars

P21 - Gracey Designed for distal surfaces of all posterior teeth

### ANTERIOR

P22 - Gracey Short contra-angle, for adaptability on incisors and cuspids

## Feline Scaler/Curette Kit

The Feline Scaler/Curette Kit is a set of six instruments especially effective in the scaling work(both supra and subgingivally) of the delicate feline teeth.

P12 - Interproximal Scaler For posterior supragingival interproximal scaling

P19 - 1/2 Gracey Mini Feline Scaling Curette For subgingival scaling and delicate incisor scaling

P24 - 5/6 Gracey Mini Feline Scaling Curette

Slight forward pitch for better access to different portions of mouth during subgingival work

P26 - 11/12 Gracey Mini Feline Scaling Curette Bent for angled scaling surface

P28 - 11/14 Gracey Mini Feline Scaling Curette Angled for mesial and distal access

P29 - 12/13 Gracey Mini Feline Scaling Curette Angled for mesial and distal access

## Feline Elevator Kit

Set-up for feline extractions, including straight as well as inside and outside curved serrated gouges.

EX15  
EX16  
Designed with a chisel edge and grooves to fit the anatomical shape of the root

EX17  
EX18  
Useful left and right elevators provide leverage when lifting sectional roots of multi-rooted teeth

EX14

EX12  
Small surgical elevators providing palatal access for small teeth.

## Exodontial Setup

EX1  
To aid in the reflection of the epithelial attachment

EX2  
Surgical bone curette

EX3  
Large surgical elevator for general use

EX4  
Small surgical elevator for primary teeth

Elevators are particularly useful for separating the surrounding bone from the neck or root of the tooth and providing greater ease of extraction by forceps.

EX23  
Good all-purpose extractor

### Sharpening Aids

**SIS** - India Sharpeing Stone Fine grit.  
For rapid sharpening of curets and scalers.

**STS** - Plastic Test Stick  
To test curet sharpness. Autoclavable

**SIO** - Cislak Sharpening Oil  
1-oz bottle. Designed for pre-sharpening stone application. Floats away metal particles and prevents damaging heat build-up.

**SSS** - Two Angle Slip Stone Larger Stone with two flat surgaces for sharpening larger instruments and blades.
