INSTRUMENTS – CONT'D

Needle Holders – cont'd

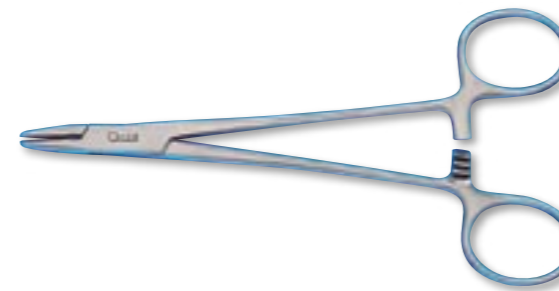

Olsen Hegar

Available 14cm, 17cm in SS and T/C Jaws and 20cm SS.

Mayo Hegar

Available 14cm, 16cm, 18cm, 20cm in SS and T/C Jaws. Also, 23cm T/C Jaws and 30cm SS.

Scissors

Available BL/BL, SH/BL, SH/SH 13-18cm. Straight/Curved SS and T/C.

Theatre Instruments

Most instruments are available in three price ranges.

NOPA is our Theatre quality surgical instruments. These are made from "German Stainless" and are precise and high quality instruments. NOPA carries the ISO 9001 certification. Coupled with value for money, NOPA surgical instruments should be the first choice for your theatre, specialist or general practice needs.

LIBERTY Surgical Instruments are made from the finest French and Japanese Stainless Steel, using German machinery and technology. All LIBERTY products are unconditionally guaranteed against manufacturing defects. LIBERTY instruments are made in Pakistan to German specifications, giving you a quality instrument at a lower price.

L.R.I. Ward Instruments use only the best steel from the leading European manufacturers to maintain top quality, maximum corrosion resistance and optimum mechanical qualities in its entire product range. These lower cost instruments are great to have available in you kennel, cage, treatment and consultation rooms.

For pricing on any of these instruments or if you're looking for something different please call your Customer Services representative on 0800 776 838.

SCALES

Provet Bench Top Weigh Scale PS-30

Features:

- Precision Load Cell weight sensing technology assures accurate and repeatable weight readings.
- Weight "Hold" mode to accurately capture the True weight of a moving animal.
- Large, backlit LCD display for easy reading in all lighting conditions.
- Dual weight units, selectable between kilograms (kg) and pounds (lb).
- Multi-function operation: Fast weighing operation; Full range tare; Net/Gross weight display; Simple counting (pcs); Auto power-off; Weight hold feature, allows greater use of your scale.
- Overload protected scale base, with "lift-off" stainless steel pan for easy cleaning and durability.
- Dual power source: Battery and Mains powered for portability.

PROVET CODE: SCAL C 01
PRICE EX GST: \$350.00

Provet Nuweigh Scales CHR-592

Electronic Platform Scales

Features:

- 26mm High LCD Display.
- Slim Line Indicator.
- 6 x AA Battery or 240 Volt.
- Animal Weigh Mode.
- Stainless Steel Platform.
- Non-slip rubber mat.
- Tare and Zero Function.
- 4 load cell design.
- High Accuracy.
- Easy Calibration.
- Wall-mounted bracket fitted.
- 12 month guarantee.

Specifications:

- **Model:** CHR - 592
- **Capacity:** 300kg
- **Resolution:** 50g or 100g
- **Platform Size:** 900mm x 550mm
- **Platform Height:** 70mm

PROVET CODE: SCAL P 2
PRICE EX GST: \$1,190.00

BLOOD PRESSURE MONITOR

petMAP Blood Pressure Monitor

petMAP New Technology for better Accuracy

- Battery powered veterinary blood pressure measuring device which has been optimized for accuracy by comparison to intra-arterial BP measurements in cats and dogs at 3 different cuff sizes.
- Utilizes the oscillometric method which simplifies the measurement of blood pressure in companion animals. Makes no noise so animal remains calmer and less stressed, enhancing accuracy.
- Less stressful to use in aware animals as there is not need to clip the fur, no application of ultrasonic gel and no need to position a transducer over the animal's artery.
- Measures all the blood pressure parameters (systolic, diastolic, mean arterial pressure and heart rate), enabling accurate diagnosis and management of hypertension through the use of Nominal Session BP (NSBP). The NSBP is displayed for the user by cycling the power OFF then ON after a BP measurement session with an animal is finished. All of the session readings are then analysed by the petMAP and a Nominal Session BPO is displayed. This is not an average of the BP readings, but a substantially more robust statistical measure of the animal's BP during the BP session since it eliminates BP outliers.
- Useful for monitoring BP and heart rate during surgical and dental procedures on animals under anesthesia.
- Range of cuffs available that are species specific as well as being able to choose cuff site (forearm, tail or hind foot) which increases accuracy compared to intra-arterial pressure measurements.

Controls and Indicators

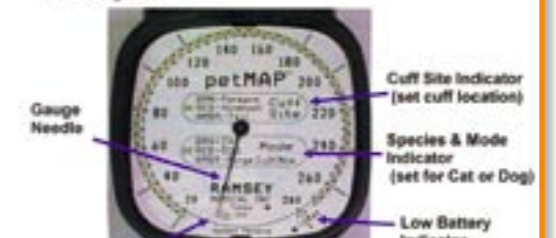

Power Button: Power button turns the device On/Off. (In order to conserve battery life, the petMAP will automatically shut off after 10 minutes of "no use")

Multi-Function Button:

1) **Display Brightness selection:** Pressing and holding down the multi-function button adjusts the brightness of the LED's illumination.

2) **Species and Cuff Site selection:** Repeated quick presses and releases incrementally selects Cat (GRN) or Dog (RED) and cuff sites: forearm (GRN), hind foot (RED), or tail (AMBR). Always setup for the appropriate situation before measuring and recording the BP.

Zero Indicator (with no pressure, needle should be in oval)

PROVET CODE: PETM BP M
PRICE EX GST: \$2,815.00
